

How to access *Aquatic Activity and Swimming for Health* on the NHS Learning Hub

Here is the URL for the NHS Learning hub <https://learninghub.nhs.uk/>

If you don't already have a Learning Hub account, it is best to go here first and create one.

If you have an NHS email address or an OpenAthens account, you'll be able to set up an account easily with those credentials and access all learning on the Hub.

If you are using a non-NHS email address, you can still create an account but will only be able to access learning that has been tagged as 'General Access'.

Luckily *Aquatic Activity and Swimming for Health* is a General Access programme and available to all!

If you are following the non-NHS route, and it asks for your place of work, please select 'other' if it is not on the list.

When you are all set up, here is the link to access the programme:

<https://learninghub.nhs.uk/Catalogue/Aquatic-Activity-and-Swimming-for-Health>

If you have any issues at all please use the URL below and find the solution or raise a ticket with the support team.

<https://support.learninghub.nhs.uk/support/home>

Many thanks

The Technology Enhanced Learning team,

NHS England
